

MAINE'S COMPLETE SOLUTION FOR YOUR FORESTRY & RECYCLING NEEDS

HERE FOR ALL OF YOUR **FORESTRY & RECYCLING NEEDS**

WHOLE TREE CHIPPERS

EVERY BANDIT WHOLE TREE CHIPPER IS DESIGNED FROM THE GROUND UP TO SAVE YOU MONEY. SOLID DESIGN, DURABLE ALL-STEEL WELDED CONSTRUCTION AND HEAVY DUTY COMPONENTS STAND UP TO THE TOUGHEST JOBS AND MAXIMIZE YOUR UPTIME.

FEED SYSTEM

The slide box feed system is key to a Bandit chippers performance allowing each machine to easily pull and compress material into the chipper disc or drum increasing productivity.

TRACK WHOLE TREE CHIPPER OPTION

Whole tree chippers are an essential tool in most land clearing applications in that they allow you to take the chippers to the trees eliminating the need to skid or forward material to a stationary chipper. They are also a great option when chipping from a landing in that they make it much easier to position the chipper for loading chip trailers. Bandit uses only cat undercarriages.

THE BEAST® HORIZONTAL GRINDERS

BANDIT'S HORIZONTAL GRINDERS ARE THE BEST ALL AROUND GRINDERS WHEN IT COMES TO GRINDING DUE TO THEIR ABILITY TO CUT MATERIAL APART COMPARED TO THE BEATING ACTION OF MOST COMPETITIVE GRINDERS. THIS CUTTING ACTION ALLOWS THE BEAST TO GRIND A WIDE ARRAY OF MATERIAL WITH LESS VIBRATION REQUIRING LESS HORSEPOWER AND FUEL.

Available in 6 models as towable, electric, or self propelled track unit with capacities ranging from 18" - 45"

APPLICATION OPTIONS

Various teeth, screen and gate options are available so customers can set each machine up based on the type of material needing processed and sized.

GRIND WITH EASE

In addition to the cutting action, most Beast models feature larger diameter cutter mills turning at a slower RPM, in turn producing a tremendous amount of torque for grinding larger diameter material with ease.

ARJES SLOW-SPEED SHREDDERS

BANDIT CUSTOMERS HAVE ACCESS TO SELECT ARJES SLOW-SPEED SHREDDERS. RIP, SHRED, AND CRUSH THE WIDEST VARIETY OF MATERIALS UNLIKE ANY OTHER SHREDDER ON THE MARKET. BUILT FROM THE GROUND UP TO BE THE MOST UNIVERSAL SHREDDERS, OUR CUSTOMERS ENJOY AND BENEFIT NOT ONLY FROM THE POWER AND PRODUCTION OF THESE MACHINES, BUT ESPECIALLY FROM THE EXTREME VERSATILITY.

2-STAGE CRUSHING PROCESS

Large material is initially pre-crushed by the shaft geometry. The secondary double jaw breaker in conjunction with the breaker bar generates a specific final product size.

QUICK CHANGE CASSETTE

Remove or change shafts within hours with the shaft cassette system. Allows for each shaft set to slide out for easy maintenance, refurbishment and changing of shafts.

OVERBELT MAGNET

Powerful permanent magnet is standard and effective for separating metal.

TRACK CARRIERS

BANDIT TRACK CARRIERS ARE HIGH-PRODUCTION LAND CLEARING MACHINES, AVAILABLE WITH EITHER A POWERFUL MOWER/MULCHING ATTACHMENT OR DEDICATED STUMP GRINDING HEAD THAT CAN BE SWITCHED IN A MATTER OF MINUTES.

All Bandit track carriers ride on industry proven CAT® steel-track undercarriages. Cabs tilt forward for easy access to all major components for maintenance and repair, reducing downtime both in the field and at the shop.
